Have you ever noticed that the louder some teachers get when reprimanding students, the louder the students also become? Learn how to manage a brain-compatible classroom without ever raising your voices. Alleviate at least 50% of your behavior problems just by the way you set up the physical environment and deliver engaging lessons, another 40% by developing a comprehensive plan and the most challenging 10% by using strategies for chronic behavior disorders such as oppositional or conduct disorder. Participants in this session will learn to:

- Identify the characteristics of a proactive classroom manager;
- Create a classroom environment conducive to learning and a home environment which alleviates stress;
- Develop instructional activities which foster student engagement;
- Develop a management plan with rituals, celebrations, and consequences; and
- Gain confidence in dealing with the most difficult behavior challenges.
