Program

Participate in this exciting hands-on and interactive demonstration and leave with plenty of resources and ideas to enable you to walk into your classroom ready to teach this science unit with more confidence and clarity.

Alberta Science Network professional development workshops are geared to new teachers, teachers new to a grade level, or teachers looking for new ideas and resources to support their science units. They provide experiments and demonstrations that teachers can use in their classrooms and enhance teachers' knowledge of the theory behind the science.

Presenters

Ed Kusmirski

Ed Kusmirski, P.Eng., is the Executive Director of the Alberta Science Network and has been providing workshops through the Alberta Science Network for Teachers in Alberta for a number of years. These workshops are directly linked to the Alberta Curriculum.

Registration Notes

Session will be held in the library.
