Program

Big Ideas, Student Projects and Current Issues – project AGRICULTURE

Explore big ideas like democracy, consumerism, diversity, sustainability, histories, innovation, technology and globalization through agriculture! Find out how to use the project AGRICULTURE curriculum-based program in your junior and senior high Social Studies and Science classrooms. Access examples of sources and stories, engage with interesting and quirky trivia questions, find Alberta farm and farmer photos and videos and explore student-created projects that help your students make connections between big ideas in curriculum and agricultural issues and challenges.

This session will provide practical suggestions for using the project AGRICULTURE program with your students as project-based, or simply, activity-centred learning – and within in-class or remote learning contexts. Download any of the project/activity teaching guides, students learning sources, assessment tools and vocabulary supports or receive free print versions of any of the resources.

Presenters

.Patricia Ramsay

Patricia Ramsay is a former classroom teacher and consultant, who currently works on the development of curriculum-based resources and professional learning for organizations interested in supporting effective learning and teaching. She led the creation and development of the project AGRICULTURE program, working with an advisory group of Alberta teachers and several Alberta farmer organizations.

Registration Notes

This project is covered by the agricultural producer groups who have supported the development of the Project AG resources – AB Milk, Chicken, Turkey, Egg Farmers, Hatching Eggs, Pulse Growers, Canola and Wheat/Barley
